I'm a very concerned business owner on main Street worried for the future of our town

Caibidil: Draft Clondalkin Local Planning Framework » Chapter 4: Green Infrastructure

I wish to object to changes proposed by the council. The narrowing of the junctions and roads for cycle lanes is a clear attempt to prevent people accessing the village and as a business owner in the village of the last 40 years and resident I find this extremely worrying and stressful. This will only add to the increase of emissions from cars stuck in traffic.

It makes no sense to make it more difficult for motorists to do business in our village. On our many meetings with South Dublin cc a few months ago we agreed this proposal would not be implemented. People need access to the village by car for the many schools and businesses in the area.
