## Observations:

### Chapter 4: Green Infrastructure

**Caibidil:** Volume 1: Written Statement » Chapter 4: Green Infrastructure

I object to the proposed residential build on the green area facing the View/Dale Belgard heights and also Belgard community centre green area.

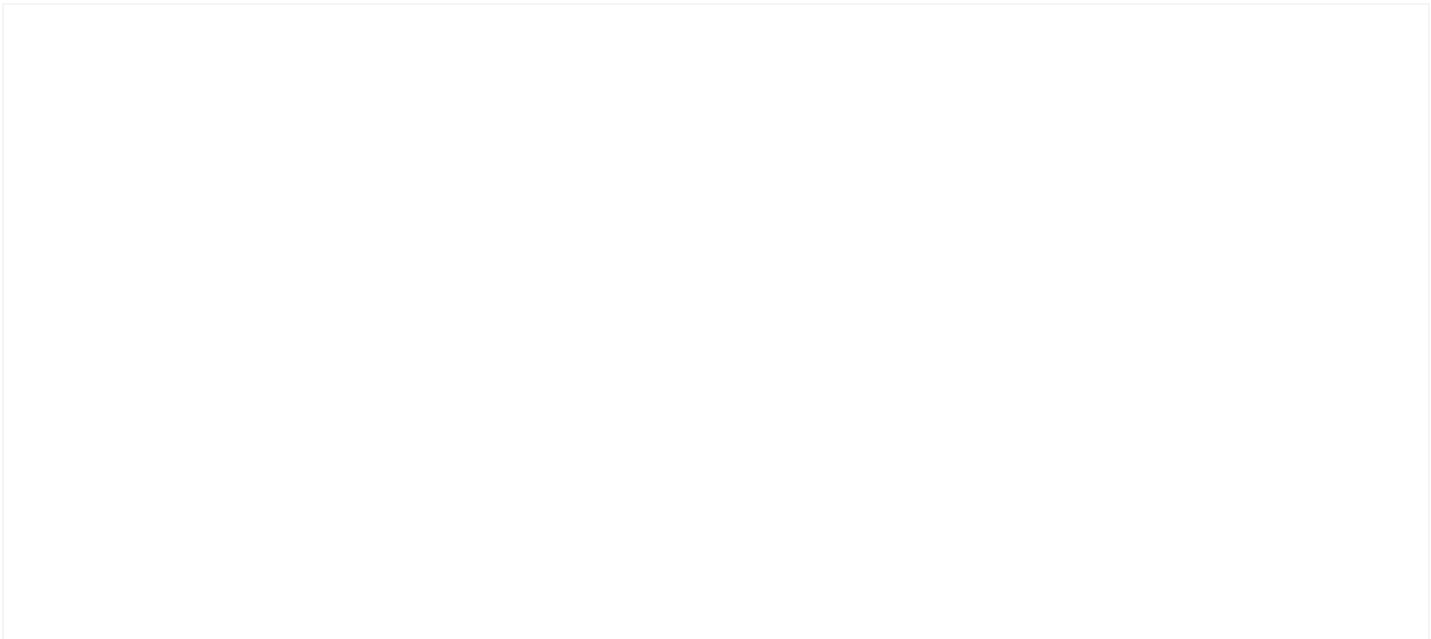

These green spaces are for our children to play and our residents to walk.

We take pride in our estate and the green spaces provide access to our local shops, and amenities. Access to the Luas is also part of our green spaces, we fought for new footpaths to be laid. Our trees on these greens are 50 yrs old and are also part of our community.

Our community centre is a vital part of our estate.
