Submission re Clondalkin Local Planning Framework

Dear Sir/Madam,

We wish to object to a number of the proposals in the Clondalkin Local Planning Framework. The changes will have major negative impacts on residents of all areas moving around the village.

They will also have a major negative impact on the local businesses in the centre of the village.

Clondalkin experiences gridlock most school days at opening and closing times and the proposals will exacerbate the situation.

Last winter after exhaustive research by KPMG and SDCC they reported to residents associations and business groups that the roads were not wide enough for cycle lanes. And yet here they are proposed again.

We object to the following

1. Narrowing the junction between Orchard Rd and Monastery Rd.
2. Further narrowing the roundabout at Monastery Rd and Woodford
3. The reduction in all junction sizes around the village
4. Proposed cycle lanes which fly in the face of the assurances given earlier this year.

These proposals should be abandoned immediately.

Yours sincerely,

Annemarie Sullivan

James Sullivan.
