

- GENERAL NOTES:**
- Drawings to be read in conjunction with Architect's Design Report accompanying the application.
  - Drawings to be read in conjunction with Landscape Architect's drawings and reports, Services Engineers' drawings and reports, Civil & Structural Engineers' drawings and reports and all other surveys and reports accompanying the application.
  - Method statements and temporary works proposals including sequencing to be submitted by contractor to Structural Engineer for acceptance prior to demolition work.
  - Note existing structures are uneven and existing levels may vary in relation to the levels shown.
  - Refer to the Design Statement and Architectural Impact Assessment for further information on the repair and conservation of historic fabric.
  - Refer to the Photographic Survey for further information on the condition of the building.
  - All existing historic masonry structures will be assessed in detail prior to construction and minor repairs, consolidation, raking out of joints, repointing and render repairs will be carried out using lime based mortar/render to match existing as necessary.
  - Where repair works are noted best practice conservation techniques will be undertaken, to include graft repairs, mortar repairs & structural reinforcement (embedded or hidden) where required.
  - Additional repair works may be required following full inspection from scaffolding. Indicative repairs shown for planning purposes.

Use typed dimensions only. Do not take dimensions from drawings on site. Read in conjunction with architectural and engineering drawings. Report any discrepancies to the Architect and they will be responsible for correction prior to construction work in hand.
